

GD-301-19"-1-SNMP

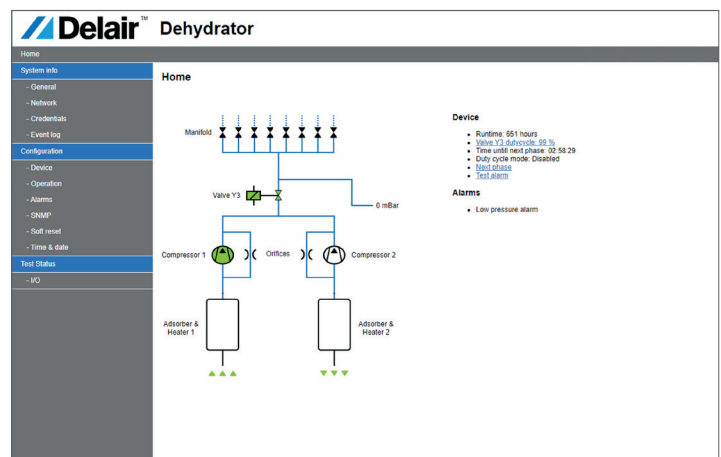

If moisture is your enemy, Delair™ is your friend. We specialise in the design and development of pressurizers, ambient air, compressed air and gas conditioning equipment to protect electrical and electronic systems in telecommunications, broadcast, commercial and military applications.

By providing accurate humidity control, Delair™ units preserve your equipment, prolong its working life and reduce maintenance requirements.

WHY DELAIR™ GD-301-19"-1-SNMP

- Internet communication / web interface
- Compact design
- Dry air capacity > 300 l/h
- Low noise / low vibration
- Low energy consumption
- Low energy consumption
- Mounting brackets included

Specifications	GD-301-19 ^{''} -1-SNMP		
	230VAC		48VDC
Operation	Fully automatic and continuous		
Dry air capacity (l/h) at 20 mbar	> 300		
Outlet dew point at 23°C and 83% RH	< -40 °C		
Standard working pressure (mbar)	20 - 30		
Other pressure ranges on request	40 - 80		
Power Supply (V)	240V-50/60Hz		48VDC
Power consumption			
- Drying (W)	70		
- Regeneration (W)	135		
- Stand-by (W)	15		
Sound level dB(A)	<55		
Weight (kg)	25		
Outlets, with shut-off valve	1 Tubing 8 mm OD , other connections on request 3 and 6 outlet manifold as optional		
Location	Indoors		
Enclosure	IP40		
Ambient temperature	-10°C - +50°C		
Relative humidity	Max. 95%		
Mounting	Width (mm)	Depth (mm)	Height (mm)
- 19" Rack	482.6	400	122
- Wall mounting	465	434	122
- Floor/Table mounting	465	400	128
Combined alarms, dry contact	Low-, high pressure, Run Time		
	Humidity alarm (optional)		
Communication	TCP/IP Ethernet		
	SNMP
